Environmental Community

SPECIAL SUPPLEMENTAL HOT LIST for the STATE SENATE

SHB 1614, Invest in Clean Water, one of four Environmental Community Priorities, just passed out of the House and is likely to come before the Senate tomorrow. There has been a lot of misinformation circulated about this bill. This hotlist responds to those misleading arguments.

Respectfully,

Clifford R. Traisman, State Lobbyist, Washington Conservation Voters & Washington Environmental Council

Assertion: SHB 1614 is a tax and not a fee, and is subject to 18th Amendment restrictions on gas taxes.

FACT: SHB 1614 is a polluter-pays fee. It is imposed at the refinery, not at the gas pump. This bill meets the legal test for a fee: i.e. there is a direct relationship between impacts caused by the oil industry's products and the use of the funds raised through the fee. This bill has been reviewed by outside legal counsel and legislative staff to ensure it is crafted as a fee. Because this is a fee which mitigates against an impact, it does not have any relationship to the 18th amendment, which applies only to gas taxes.

Assertion: SHB 1614 unfairly singles out and punishes petroleum, one of thirteen identified sources that can impact stormwater runoff.

FACT: Petroleum products are by far the most significant contributor to stormwater pollution levels. Ecology estimates that between 45% and 65% percent of stormwater pollution comes from petroleum. The fee ensures that oil companies take financial responsibility for the pollution caused by their product.

Assertion: SHB 1614 will cost citizens and businesses over \$100 million per year (1.2 billion over the next 10 years according to OFM) in new taxes at a time when our state's economy is struggling.

FACT: The funds that are raised from this fee on international oil companies **will go directly back into the local economy** in jobs and materials. Stormwater public works projects will generate significant new jobs in the construction and other trade industries. Without this polluter-pays fee, local taxpayers would have to pay the full cost of federally mandated obligation. This fee on petroleum products is a much fairer way of collecting fees directly from the source of the pollution.

Please join the House and also vote to SUPPORT SHB 1614, Invest in Clean Water, when it comes for a vote.
